OXNARD UNION HIGH SCHOOL DISTRICT

DRUG-FREE WORKPLACE CERTIFICATION

Due upon issuance of Purchasing Order to Awarded Bidder

Project/Contract between the Oxnard Union High School District ("District") and
BALLISTIGLASS, LLC ("Contractor" or "Bidder").

This Drug-Free Workplace Certification form is required from the successful Bidder pursuant to Government Code section 8350 et seq., the Drug-Free Workplace Act of 1990. The Drug-Free Workplace Act of 1990 requires that every person or organization awarded a contract or grant for the procurement of any property or service from any state agency must certify that it will provide a drug-free workplace by doing certain specified acts. In addition, the Act provides that each contract or grant awarded by a state agency may be subject to suspension of payments or termination of the contract or grant, and the contractor or grantee may be subject to debarment from future contracting, if the contracting agency determines that specified acts have occurred.

The District is not a "state agency" as defined in the applicable section(s) of the Government Code, but the District is a local agency and public school district under California law and requires all contractors on District projects to comply with the provisions and requirements of the Drug-Free Workplace Act of 1990.

Contractor must also comply with the provisions of Health & Safety Code section 11362.3 which prohibits the consumption or possession of cannabis or cannabis products in any public place, including school grounds, and specifically on school grounds while children are present.

Contractor shall certify that it will provide a drug-free workplace by doing all of the following:

- a. Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance is prohibited in the person's or organization's workplace and specifying actions which will be taken against employees for violations of the prohibition.
- b. Establishing a drug-free awareness program to inform employees about all of the following:
 - (1) The dangers of drug abuse in the workplace.
 - (2) The person's or organization's policy of maintaining a drug-free workplace.
 - (3) The availability of drug counseling, rehabilitation, and employee-assistance programs.
 - (4) The penalties that may be imposed upon employees for drug abuse violations.

- c. Requiring that each employee engaged in the performance of the contract or grant be given a copy of the statement required above, and that, as a condition of employment on the contract or grant, the employee agrees to abide by the terms of the statement.

I, the undersigned, agree to fulfill the terms and requirements of Government Code section 8355 listed above and will publish a statement notifying employees concerning (a) the prohibition of controlled substance at the workplace, (b) establishing a drug-free awareness program, and (c) requiring that each employee engaged in the performance of the Contract be given a copy of the statement required by section 8355(a), and requiring that the employee agree to abide by the terms of that statement.

I also understand that if the District determines that I have either (a) made a false certification herein, or (b) violated this certification by failing to carry out the requirements of section 8355, that the Contract awarded herein is subject to termination, suspension of payments, or both. I further understand that, should I violate the terms of the Drug-Free Workplace Act of 1990, I may be subject to debarment in accordance with the requirements of the aforementioned Act.

I acknowledge that I am aware of the provisions of and hereby certify that I will adhere to the requirements of the Drug-Free Workplace Act of 1990 and Health and Safety Code section 11362.3.

**BID NUMBER 641
Thermal Body Scanners**

OXNARD UNION HIGH SCHOOL DISTRICT

Thank you for the opportunity to bid on this project. It is our honor to offer the BallisDETECT® fever detection system.

BALLISTIGLASS, LLC was founded in Parkland, FL by John and Vanessa Mehew; just ten months before the tragic mass shooting at Marjory Stoneman Douglas High school. Our company responded to that act of violence with donations of bullet resistant glass for various schools in the area. Since then, we have sold and installed ballistic resistant glass, fever detection systems and stealth weapons detection systems to numerous public and private sector customers.

Our sole mission is to protect those who may unwittingly find themselves in harm's way; including municipal workers, legislators, members of our judicial system and certainly our nation's children, while they are attending school. At BALLISTIGLASS, we strive to keep ammunition and ballistic weapons from entering building space, as well as keeping anyone with a fever from entering a building and possibly infecting others with viruses, infections and influenza.

In addition to our staff in Parkland, FL at our headquarters and Deerfield Beach, FL at our factory; our business development team has offices in Phoenix, AZ and Roseville, CA. We strive to employ those who are passionate about the safety and wellness of our nation and its inhabitants.

Again, we appreciate your consideration. Should you have any questions, please contact us at (800) 960-4097.

Thank you,

John Mehew, CEO

The BALLISTIGLASS Mission

School Safety...It is embedded into the BALLISTIGLASS family's DNA. Keeping students safe and ready to learn is the mission that we are charged with every day. From the top-rated retrofit bulletproof glass available in the US, to our best-in-class stealth weapons detection system, or our high-speed fever screening technology, every product is designed to surpass all expectations. We owe that to our schools and to our communities.

BALLISTIGLASS walks the walk. Whether it's our donation of bulletproof glass to help a traumatized community in Parkland feel safe again; or shipping, at our cost, a loaner BallistiSCAN weapons detection system to any school facing a threat; we put our money where our mouth is.

We sincerely hope that you'll partner with us. We will not let you or your students down

- BallisDETECT Quick Start Guide:

STEP 1: Congratulations on your purchase! Please remove the BALLISDETECT case from its shipping box.

STEP 2: Using a scissor, cut the zip tie that is locking the case. Locate the pressure release valve (knob) under the case handle and turn counterclockwise to release any vacuum (if needed).

STEP 3: Open the case by releasing the four (4) latches. Lift the lid and then remove three items: the Laptop PC (with charging plug), the IR camera, and the tripod (found in the black bag).

STEP 4: Keep the Wi-Fi router and power strip in the case for their protection. Remove any twist ties on the cables. Make sure the router and IR camera power cables are plugged in to the power strip. Also, make sure to tighten the camera shoe on the bottom of the camera so that it will be more stable once on the tripod.

STEP 5: Extend the feet of the tripod to their full length. Extend the tripod head to its maximum height by loosening the side knob (be sure to re-tighten the knob). On the top of the tripod, there is a quick release lever. This will allow the camera shoe on the underside of the IR camera to attach. Join the shoe to the tripod and re-lock the release lever. Plug the power strip's plug into a grounded wall socket. A blue light on the strip indicates power to the camera and router. Tuck the excess length of any power and Ethernet cables into the case for safety. We recommend keeping the case under the tripod as pictured on the left.

- **NOTE:** The ideal placement for BALLISDETECT to accurately measure temperature and recognize a face is 4 to 8 feet away from the subject. Make sure the camera is facing an aisle of foot traffic such that the subjects' faces are uniformly and adequately illuminated (generally 200 – 800 Lux) with no backlighting. Avoid sunlight, wind, and any situation where the climate would affect the infrared camera's ability to get a clear reading.

STEP 6: Open the laptop, start up the computer by pressing the power button. BALLISDETECT is operated using the "AI Thermal Camera HH" application installed on the provided laptop. Click on the  icon that is found on the lower taskbar of the desktop. A login prompt will appear. The default user name is "admin". The password is **123456**.

STEP 7: Once the application starts up, the screen will look like the image to the left. The laptop is factory set to connect to the Wi-Fi router in the case. To connect to the IR camera, click the blue button labeled "Connect" in the upper right of the application's window. Once the camera has connected, the optical and infrared images will appear and real time analysis will begin. A buzzer will sound if the temperature as set in settings is exceeded.

Added Value

Despite the extreme accuracy of BallisDETECT, it is recommended by the FDA that a black body calibration instrument be used to check the accuracy all IR fever detection systems. BALLISTIGLASS includes a black body instrument with the purchase of each BallisDETECT kit.

“To get a reliable surface reading, most thermal cameras must calibrate against a “black body” accessory... The camera indicates the difference between the subject’s and the black body’s predetermined temperature.”
